

Labor Party Fusion Power Campaign Detonates Edward Teller

CHICAGO, Sept. 1 (IPS) — Edward Teller, father of the hydrogen bomb, sat stone-faced today while U.S. Labor Party organizers indicted him here as a Nuremburg criminal at the Project Independence hearings. Labor Party spokesmen pointed to Teller's role in implementing the Rockefeller plot to sabotage fusion power research and his activities as a leading member of Rocky's Commission on Critical Choices, as evidence of Teller's crimes against humanity. Some members of the audience of reporters and a few "interested" citizens booed the Labor Party while others nodded agreement.

Teller detonated only after the Labor Party organizers were escorted out of the meeting. He ripped up his prepared speech and launched into a 20-minute tirade in response to the Labor Party's indictment. Teller

defended his master/slave relationship with Rocky: "I've known Nelson Rockefeller for years and he never interrupts me. He's most thoughtful and a most conscientious man." He went on to justify his master's stance towards the human race: "What may come is a disturbance which may become worse than the depression of the '30s, and that's why urgent measures are necessary."

Teller tried to get a grip on himself, delivering a confused and rambling discussion of "alternative" energy sources. Repeatedly, he referred to underground coal gasification experiments, which even a bought man like Teller must recognize as ludicrously primitive from a scientific standpoint. This and his other proposed "alternatives" are merely Rockefeller's slave labor "development projects."

CIA Covers Right Flank with Left Hand

DETROIT, (IPS) Sept. 15 — Caught with their pants down, the CIA and FBI have activated the National Lawyers Guild (NLG) and other "left" swamp creatures in an attempted coverup of the U.S. Labor Party's exposure of FBI agent Vernon Higgins and his abortive penetration of the Labor Party in Detroit this past summer. Higgins confessed to Labor Party organizers June 20 that the FBI had instructed him to gather information on Labor Party security measures — information probably for use in attempts to deploy hit squads against the Labor Party and its periphery. June 21 police raided the Detroit office, stealing lists of Labor Party contacts and other materials.

Lawyers affiliated with the Labor Party who attended the National Lawyers Guild convention in Minneapolis last month found that the NLG was actively spouting the

FBI's line: that "Higgins wasn't an FBI agent, and anyway the Labor Party recruits from the racist right-wing Detroit group 'Breakthrough'." The NLG **knows** this to be a lie. Labor Party organizers previously had briefed the National Lawyers Guild on the facts of the case, including the search warrant used to break into the Labor Party's Detroit office, in which the FBI names Higgins as one of their special agents.

The Detroit Lawyers Guild has its own reasons for attacking the Labor Party. The Labor Party a year ago exposed the Detroit Lawyers Guild executive secretary Allan Houseman as an OEO agent actively pushing the slave-labor/recycling WIN II program. Now the NLG is spreading the actionable slander that the Labor Party plans to assassinate Houseman!
