

intensive projects in the Third World. The financing was accomplished through the issuance of short-term paper to the Arabs via the French nationalized banking sector.

Both Giscard's new planning council and the CNFF announced last week that the future of French industry was in the oil-producing countries. Exports to the Mideast already have increased 55 per cent in the first seven months of this year. Next week, an important delegation of CNFF officials will be in Algeria, where they are expecting to receive a 10 billion Franc contract for the installation of factories there. Other markets which the CNFF considers open to them are Iran, Iraq, Indonesia, and Nigeria.

One of the key figures in implementing Rockefeller's policy in France is Jacques Ferry, who holds three major positions on the CNFF. Aside from being its Vice President, he is also President of its International Relations Committee and head of its Steel Federation. Ferry originated the "Ferry Plan," a policy of concentrating steel production in coastal areas while removing manpower from other areas. Its successful implementation has led to the construction of the huge Fos-sur-Mer steel and oil refinery complex near Marseilles. Recently 3,000 workers who were just laid off from the Lorraine steel plants have "agreed" to be relocated to Fos, where death rates are among the highest in the country.

In order to facilitate the flow of Arab funds into France, the regional planning agency DATAR, directed by "seal and search" expert Minister of Interior Poniatowski, has just announced the opening of a new office in the Persian Gulf.

UMW FUNDS PRODUCTIVITY STUDY BY BRAINWASHER

Oct. 18 (IPS)--IPS has come into the possession of documents that show that the United Mineworkers (UMW) is funding at least one of Dr. Eric Trist's three phase productivity studies in the coal fields. Trist, a leading CIA psychiatrist, is a brainwashing specialist.

Operating out of the Rockefeller funded Tavistock Institute, Trist was largely responsible for the destruction of the British Miners Union and mass layoffs of "unproductive miners" over the last two decades. Documents reveal that Trist is currently doing pioneer work that will lead to drastic layoffs in American coal fields and redeployment of miners to energy development projects.

One of Trist's current projects to produce "self-regulating" work teams (gangs) at the Rushton Mine in Johnstown, Pa. is being conducted under the auspices of the National Commission on Productivity (NCOP) of which Trilateral Commission member I.W. Abel has been a leading member. Trist, who presently operates out of the Wharton School in Philadelphia, is also employed by NCOP's National Quality of Work Center in Washington, D.C.

The Rushton study after one year is now in its third phase, during which worker-management committees have replaced foremen

and are setting wage levels and working conditions. This study in fascist labor methods is being financed jointly by Rushton mines and the UMW at \$32,500 each!

AGENTS IN PSP ATTEMPT HARASSMENT
OF LATIN LEFTISTS CLOSE TO LABOR COMMITTEES

NEW YORK, Oct. 17 (IPS)--In a last-ditch attempt to stop the growing hegemony of the National Caucus of Labor Committees and the Latin American Labor Committees in Latin communities throughout the United States, the CIA-controlled right wing of the Puerto Rican Socialist Party (PSP) has launched a campaign of harassment against former PSP members who have joined or come around the Labor Committees in the past few weeks.

The attacks are aimed directly against Labor Committee exposure of the CIA's plan to provoke race riots to divert the enormous ferment in Latin communities from working-class organizing into suicidal in-fighting between groups of workers. In reality the goals of these groups are identical: To stop the Rockefellers' plan for fascism, and to create workers governments worldwide within the next few years.

Based on our organizing the Labor Committees have the political credibility to blow the PSP wide open in the U.S. Along with the Revolutionary Union and the Socialist Workers Party, the PSP is one of the CIA's major U.S. countergang-type networks. The Labor Committees intend to pull out of the PSP the entirety of its pro-working-class membership. This potential is driving the agents within the PSP and their controllers into hysteria.

Desperate Moves

This hysteria has led them to stupid, desperate moves. Oct. 4 a car belonging to Ramon Ayala and Carmen Caceres was destroyed by fire--just three days after they officially joined the Labor Committees. Yesterday, the car of Juan Caceres, Carmen Caceres' brother, also was burned. Juan is not a member of the Labor Committees but has been so identified recently because of his close work with the Latin American Labor Committees.

The Labor Committee Security Staff has identified the arsonist as an agent-provocateur inside the PSP. This person had been pointed out to the leader of the U.S. branch of the PSP, Ramon Arbona, as an agent by both Carmen Caceres and Ramon Ayala many months ago. The agent in question is well known to other PSP members as an inciter to semi-terrorist activities in that group. He has taken credit for many "rip-offs," and claims to have been a member of ROTC--where he may have been recruited or brainwashed into the ranks of CIA operatives. Just before the attack on Ayala's car, the agent was heard to say that he was "out to get Ramon's ass."
