

## ROCKEFELLER BANKS FOOD SUPPLIES, STARVES INDIA

Nov. 19 (IPS)--U.S. stonewalling on the question of immediate food aid to the famine-wracked Indian subcontinent can be laid squarely at the feet of the Rockefellers. A spokesman for the second-largest international grain dealer, the Rockefeller-controlled Continental Grain Company, confirmed today that at least 80 per cent of U.S. grain reserves are in the hands of private companies like his own.

"The government's now out of the business of holding stocks," the Continental representative stated.

Official Food and Agriculture Organization statistics show that between 1972 and 1973 in the U.S., reserve stock holdings of private merchants doubled while government and farmer-held stocks declined by 100 and 60 per cent respectively.

"Importers like India have to become more responsible," the Continental spokesman asserted, justifying the hideous Rockefeller starvation policy for which the U.S. government is fronting. President Ford recently stated that the U.S. government could make no further commitment of food aid.

Contrary to Rockefeller cabal propaganda, there are upwards of 100 million tons of "carryover" of uncommitted grain in the world right now, more than three times that required to halt the starvation genocide in India and Bangladesh.

## D'ORNANO CONCLUDES FRENCH DEAL WITH SHAH

Nov. 19 (IPS)--French Minister of Industry Michel D'Ornano confided Nov. 17 to the French press agency Agence France Presse that the overall worth of plant and equipment Iran intends to purchase from France will be closer to \$10 billion than to the \$5 billion initially agreed upon last spring. French industrial capitalists are expected to supply the Shah's slave-labor projects with five nuclear plants, one special steel factory, and a subway system for Teheran. In addition, France is also expected to "contribute" to Iranian development in the areas of telephone communications, color television, auto, and chemicals. As D'Ornano returned from his four-day visit with the Shah of Iran, Western press sources gloated over the magnitude of the gigantic boondoggles which the Shah seems to be preparing for foreign, Rockefeller-allied investors.

Although Iran has not yet concluded deals of a similar magnitude with other industrialized countries, well-informed sources think that a German contract analogous to the French soon will be finalized. The basis for this projection is a spate of persistent rumors circulating in Teheran, according to which the Shah is preparing to purchase large quantities of Bayer and Volkswagen shares with Iranian "petrodollars."
