

The objective of the Bundespost operation is to close down the European Labor Party by cutting all international communication, at the very point that the party's own analysis of Israel's role in directing international terrorism closely intersects that of networks in the West European intelligence community who have exposed Israeli intelligence's fingertip direction of the Baader-Meinhof gang.

In France, the national Anti-Defamation League affiliate, LICA has conducted a daily surveillance and harassment campaign against members of the ELP in Paris. ELP members have received telephone death threats and have been physically attacked by psychotic LICA footsoldiers calling the ELP "anti-Semitic." On Aug. 19, the French leftist paper *Le Nouvel Observateur* slandered the U.S. Labor Party as an "extreme right sect," and complained that it is "ferociously fighting against ecology."

The source of the marching orders of this international campaign has been directly traced to the offices of the Anti-Defamation League's "Fact Finding Division" in New York, the same division which has terrorized Jewish communities for over 20 years by *funding* and creating synthetic Nazi groups. This is the same ADL whose leading member, Arnold Forstner, was once arrested for painting swastikas on synagogues as part of this shakedown operation. (For a full report on the ADL's operations, see our Aug. 7-13, 1978 issue, Vol. V, No. 30.)

Now the ADL in New York circulated an anonymous White Paper accusing the USLP and affiliated organizations of "anti-Semitic overtones." But the real concern of the ADL centers on what its White Paper describes as the three main proposals of the USLP — which in fact represent the greatest threat to the physical and financial hegemony of the Black Guelphs:

"1) Establishment of a so-called International Development Bank; 2) The use of nuclear and especially fusion power to advance technological development; 3) a so-called 'Grand Design' envisioning economic cooperation and broad working relationships among the U.S., France, German, and the USSR..."

"New Solidarity (the newspaper of the U.S. Labor Party — ed.) contends with monotonous regularity, that economic development, and peace will be halted if the conspirators have their way and 'unleash' war in the Middle East or 'assassinate LaRouche.'"

To stop the Labor Parties, the Zionists are going full tilt with operations that involve the terrorist networks of the Institute for Policy Studies and Philip Agee's British-inspired "anti-CIA" network.

To mobilize the "leftist" terrorist gangs for attacks against the Labor Party, the Los Angeles office of the ADL leaked its latest slander to the *Berkeley Barb*, a drug-advocating counterculture newspaper in Berkeley, California which has served as an "above-ground" communications source for terrorists like the

California-based New World Liberation Front. The *Barb's* story, titled "Right Wing Terror in California?" quoted ADL Los Angeles head David Lehrer at length. The same issue, devoted to terrorism, carried articles interviewing an above-ground member of the NWLF and "A Lesson from the Red Brigades."

The *Barb* article states:

As the Nazis and the KKK try to gain some undeserved legitimacy, the mantle of reactionary thuggery has recently passed to — the National Caucus of Labor Committees (founding group of the U.S. Labor Party)...many charged that the NCLC was itself a CIA or police front....Most recently, according to Lehrer of the ADL, the NCLC has 'formed a coalition with the most virulent right wing groups in California.'

On August 24, Paul Grabowicz, the author of the *Berkeley Barb* article and a correspondent for the Institute for Policy Studies-related *New Times* contacted the USLP national headquarters to announce that *New Times* was planning a feature-length slander on the USLP.

### Knights of St. John Plan Suit against USLP

According to banking sources in Europe, the Order of St. John of Jerusalem, Rhodes and Malta is planning to undertake financial warfare against the European Labor Party following Labor Party exposés of the Order's attempts to capture the papacy and its participation in international terrorist networks.

According to these sources, a more than \$1 billion legal suit is planned. The extraordinary action is primarily motivated by the Order's anticipated recapture of the papacy following the death of Pope Paul VI.

Although the material and information disseminated by the European Labor Party and the U.S. Labor Party on the Order was obtained from the public record, including the publications of the Order itself, the latter view the exposure of their networks as responsible for destroying their plans to recapture the papacy.

The Order and the black nobility tied to it are the political backers and allies of Monsignor Lefebvre, a sworn enemy of the Vatican and of Paul VI. Furthermore, the action against the ELP in the form of a suit or other financial warfare is being pushed by order of St. John members directly linked to Lazard Freres bank, a central institution in London, New York, and Paris in the operations of the Black Oligarchy.
