WAR, WAR EVERYWHERE

NEW YORK, Dec. 6 (IPS) -- Following last week's spate of planning meetings both in this country and in Europe, the Rockefeller international financier cabal this week declared open economic warfare against any and all potential enemies. Backed up by the mobilized military might of NATO and related police agencies, the Rockefeller drive is aimed at installing as rapidly as possible top-down police state control of the world economy and trade. Such control would enable Rockefeller to guarantee the repayment in tens of billions in outstanding dollar denominated debt that comes due in the next several months and weeks.

While the immediate focus of this unprecedented economic warfare deployment is to defuse "breakaway" motion in the Third World and elsewhere towards the establishment of a New World Economic Order prior to the Dec. 16 beginning of the Paris North-South Conference.

However, independent studies taken by New York-based bank analysts have confirmed IPS estimates which indicate a total collapse of the New York and Eurodollar banking network by no later than the end of January, 1976. Third World debt rollover pressure on the Eurodollar markets is already causing near panic conditions - and the peak pressure period Dec. 14-15 is still more than a week away. Similarly, the Basel-based Bank for International Settlements (BIS) this week took emergency measures to bail out Eurodollar banks in much the same way that the Federal Reserve is being forced to do for stateside banks.

With the pressure on his banks continuing to grow, Rockefeller must have accomplished this militarization of the world's commodities, oil, food supplies, or the whole shebang goes by the end of January. This is the context of the current HILEX 75 NATO maneuvers (see special report) and the current drive for a nuclear showdown with the Soviets. It also explains why Rockefeller is unlikely to back down.

A NEW OIL HOAX IN THE OFFING

Clement Mallin, a top aide to Federal Energy Administration (FEA) chief Frank Zarb, indicated to IPS yesterday that if someone wanted to wreck the North=South talks, a good ploy would be to get the Arab countries to threaten a new oil embargo. This is purely "hypot hetical" Mallin added after realizing that he had inadvertently let a key Rocke eller policy conception slip out.

A New York banking source revealed that Rockefeller allies are now maneuvering both inside and outside the oil producers cartel, OPEC, to give them leeway for action. The source indicated

that Britain - a key force in the oil energy hoax wrecking operation - would move to join OPEC on the strength of its status as an oil producer garnered from its North Sea Oil fiasco.

The purpose of a new oil hoax and the British wrecking maneuvers would be to isolate and intimidate the pro-development and pro-Soviet governments of Iraq and Algeria. The banking source openly admitted as much.

The British are not confining their activities to OPEC. They were deployed this week to wreck the pre-North-South Conference deliberations of the Common Market in Rome. British representatives attempted to rope the Europeans into supporting the Rockefeller-controlled International Energy Agency (IEA) emergency sharing scheme "which would be activated in the event of another oil embargo." The share the misery plan would effectively give Rockefeller fingertip control over oil supplies to the advanced sector.

In a related development, the pro-Rockefeller government of French President Giscard d'Estaing has effectively overridden Gaullist opposition to the "energy sharing" scheme. France is now a member of the IEA, FEA aide Mallin reported.

U.S. IMPLEMENTS FOOD CONTROL POLICIES

U.S. State Department spokesmen admitted this week that the U.S. is prepared "to use food as a weapon in the event of another Arab oil embargo" - an embargo which Rockefeller is now trying to provoke.

Such a policy is consistent with previously stated positions outlined by spokesmen for the Rockefeller cabal dating back to spring 1974. At that time Rockefeller spokesmen, including among others Lester Brown and Henry Kissinger, had pushed for implementation of food control mechanisms on a massive scale to solve the world hunger problem. Last winter, the Rockefeller family's supranational planning apparat, the Trilateral Commission meeting in secret sessions pushed food control as useful in keeping Third World countries in line, United Nations Ambassador Daniel Patrick Moynihan delivered a speech prepared by Secretary of State Kissinger informing the United Nations special session on development of U.S. support for the establishment of a "World Food Bank" - the central feature of a global food control program.

Now the food control policy - one of the cornerstones of the HILEX 75 maneuvers - is operational to be used for economic warfare purposes. Atlantic Richfield President Robert O. Anderson gleefully told the mis-named Pacem in Terris Conference in Washington, D.C. this week that "the U.S. has politicized food in much the same way that OPEC has politicized petroleum."

IPS learned this week that a special commission of the Parisbased, Rockefeller-controlled OECD has been set up to implement world food control policies. Not coincidentally, the same meeting that set up the OECD commission last May also mapped out the HILEX "exercise."

CREDIT STRANGULATION

Over the last two weeks, Rockefeller has used his fingertip control over dollar-based credit institutions to wreck havoc with the economies of his enemies. Singled out for special treatment
