

Prince Philip Wants To Kill You

by Nancy Spannaus

Nov. 29—The global pattern is unmistakable. Over the last several weeks, with increasing intensity, agents of Britain's Prince Philip's depopulation lobby have stepped to the fore, to demand the immediate implementation of blatantly genocidal plans, internationally, and especially in the United States. All you have to do is look at the implications and genesis of the calls for a Global Warming treaty, and the official recommendations of the Obama Administration's Health and Human Services Department—as we do in the articles that follow—to see the mass murderous onslaught underway.

Start with the Obama Administration's genocidal recommendation to reduce routine mammograms for all women, especially those aged 40 to 49. This was followed by the release in August of the United Nations Fund for Population Activities (UNFPA) report, which bemoaned the projected increase in population to over 10 billion by 2100, and called for a major offensive against population growth in the name of solving "climate change." The UNFPA call was immediately taken up by the German government, followed by the Danish government, which demanded that population control be part of the agenda at the Copenhagen Climate Conference (Dec. 6-18).

Meanwhile, Prince Philip's World Wildlife Fund came out, in a full-page newspaper ad in Washington, to demand implementation of the anti-human "climate" agenda. This was accompanied by a pattern of initiatives for the legalization of euthanasia worldwide, including Mexico City, France, and, not least, the United States *through the implementation of the Obama Administration's Hitler Health Plan*. The American College of Obstetricians and Gynecologists' call for limiting pap tests for women, which screen for cervical cancers, is just the next step in this series.

Then, as if to put the huge British royal imprint on the genocidal game-plan, Queen Elizabeth II and her Royal Consort, the deadly virus Prince Philip, personally attended the 60th anniversary meeting of the British

Britain's Royal Consort Prince Philip has plans to kill off billions of the world's people; he has stated openly: "In the event that I am reincarnated, I would like to return as a deadly virus, in order to contribute something to solve overpopulation" (reported by Deutsche Press Agentur, August 1988).

Commonwealth heads of state, in Trinidad and Tobago Nov. 26-27, in order to forge the 53 members of the Commonwealth into a battering ram for the Copenhagen Conference. The Queen herself, bragging that the Commonwealth represented one-third of the population of the planet, called on her devotees to go to Copenhagen resolve to impose the final treaty—despite the fact that the fraudulent and genocidal nature of the global warming assertions stands thoroughly exposed.

Targetting of Women

What we are looking at, is the British imperial attempt to carry out mass murder on a global scale greater than even Hitler ever dreamed of. As Lyndon LaRouche observed, the babblings from Queen Elizabeth will do nothing to save the British Commonwealth from its inevitable doom under the current system. But, unless LaRouche's own proposals for a Four-Power agreement to replace the bankrupt international monetary system with a Hamiltonian-style credit system are put into effect, and immediately, the British could bring billions of people with them into the grave.

One notable aspect of the British drive to deny medical treatment in the United States is the targetting of women, the demographic group that is key to increasing the population, and the group that lives the longest, thereby "taking up all those resources" in the "last six months of life." Back in the early 1980s, *EIR* published extensive interviews with genocide lobby representatives, who explained the need to target women in order to control population growth. Take the case of Thomas Ferguson, of the State Department Office of Population Affairs, interviewed in February 1981. In discussing the need for population reduction, Ferguson said: "Our program in El Salvador didn't work. The infrastructure was not there to support it. There were just too goddamned many people. . . . To really reduce population, quickly, you have to pull all the males into the fighting and you have to *kill significant numbers of fertile-age females. . . .*"

Think that sounds too extreme for our "cost-effectiveness" experts today? Don't kid yourself. They are prepared to follow their British masters, who say that the financiers have to be saved, come what may, but that the living standards and numbers of people have to be reduced. They are deadly serious—and have to be stopped.
