

## EPA Head Lisa Jackson Backs Climate Genocide

Dec. 7—In a declaration today that carbon dioxide, a harmless gas essential to life, “threatens the public health and welfare of current and future generations,” the Environmental Protection Agency (EPA) claimed for the Obama regime dictatorial power to genocidally cut economic activity. In anticipation of this, Fred Singer, the first director of the U.S. Satellite Meteorology Service, had said in April that “this finding, if acted on, would be like dropping an atomic bomb on the economy.”

EPA Administrator Lisa Jackson claimed in today’s press conference that the U.S. Supreme Court had ordered the EPA to make such a finding in a 2007 decision concerning the 1970 Clean Air Act, and that, having now made the finding, the EPA is now legally obligated to issue regulations cutting down carbon dioxide emission, i.e., agriculture and industry.

In reality, the President can stop any such “findings” or regulations; that is why no such “finding” was issued for two years after that Supreme Court decision.

By issuing that lying “endangerment statement” now, the Obama Administration is trying to threaten the U.S. Senate with unilateral actions to shut down what remains of the U.S. economy, if it fails to pass the “cap-and-trade” monstrosity. The Administration is also positioning itself to force Third World nations, at Copenhagen, to commit *hara-kiri* via “emissions limits.” All this, under the orders of Obama’s British controllers, especially Prince Philip’s frankly genocidal Worldwide Wildlife Fund.

As Lyndon LaRouche said, either EPA chief Jackson has no idea what she is talking about, or she is lying wildly. To the exposure of the fraud of the global warming “science” via the leaks from East Anglia and otherwise, she could only reply with the phantasmagoria of “polar ice caps crumbling into the oceans, changing migratory patterns of animals and broader ranges for deadly diseases, historic droughts, more powerful storms and disappearing coastlines.”
