

# Lest You Forget: The Nazi Nature of Obamacare

March 19—Contrary to many of the lies which the American public has been fed over the recent weeks’ fanatical drive by the Obama Administration to pass its health-care “reform,” this bill represents a craven, evil attempt to establish the philosophy, and specifics of Hitler’s “health-care” system into U.S. law. The following foundations of the bill, in summary, tell the story.

- The entire rationale of the bill, as expressed by the President, his budget director Peter Orszag, Orszag’s special advisor Ezekiel Emanuel, and others, is to *cut* health-care costs, which the Administration repeatedly, lyingly asserts are *the* cause of the fiscal problems of the United States—while they continue to pour trillions into the financial sector.

- The scope of the cuts identified by these officials amounts to a stated 30% of medical expenditures, which they have repeatedly designated as “not good” for your health.

- The means for determining what health expenses are “not worth it” are provided for, throughout the legislation, including such tools as “comparative

effectiveness research.” The underlying philosophy of this research is identical to that of the Nazis’ view that there are some lives “not worthy to be lived,” because the cost of treatment, or simply sustenance, is too expensive.

- Another tool for determining which treatments would be paid for, is the establishment of an Independent Medicare Advisory Board, a panel of experts identical in function to that set up by Hitler in 1939, called Tiergarten 4, i.e., a “death panel.” Those experts ruled on the life or death of patients; Obama’s experts would rule—unless overruled by Congress—on life or death, by determining what health care would be paid for. A prime example of the direction of their thinking is the ruling by the Preventive Services Taskforce on mammograms: cut them back.

- The primary targets of the cutbacks in care, are the old and sick, what Hitler called the “useless eaters,” who receive Medicare and Medicaid. Obama expressed the same philosophy, when he said he was not sure that Medicare should have paid for his grandmother’s hip replacement.

- Far from cutting out the private sector, the Obama plan maintains and strengthens the control of the HMOs and the drug conglomerates over the health care, guaranteeing their income stream, profits, and power: a corporatist, i.e., fascist arrangement.
