LaRouche's SDI:
The World That Should Have Been
by Jeffrey Steinberg

The current crisis in world affairs did not have to be. An alternative future was on the verge of coming into being in the early and mid-1980s; one that would have brought about a long period of explosive economic development, global cooperation in ending the sources of war, and a crushing defeat of the power of the British Empire. The crucial issue was the Strategic Defense Initiative (SDI), the Reagan initiative which had been crafted by Lyndon LaRouche, and which held the potential for shifting the strategic equation in favor of peace and prosperity. It was the rejection of that SDI which brought us into the current period of extreme danger.

If there is to be any hope of avoiding the current onrushing London-driven New Dark Age, the lessons of that earlier missed opportunity must be understood--and acted upon....

- **LaRouche's SDI Changed the World**
This 1993 speech by **Jeffrey Steinberg** tells how LaRouche's policy shaped the course of history— and how it was sabotaged.
- **Space:**
The Ultimate Money Frontier
This article by **Lyndon H. LaRouche, Jr.** first appeared in *EIR*, Feb. 23, 1996.
- **Towards a New Periodic Table of Cosmic Radiation**
Peter Martinson of the 'Basement Team' of LaRouche movement researchers situates the issue of cosmic radiation in terms of the problems posed by Max Planck, Albert Einstein, and their collaborators, and describes areas of promising research opportunities.

by Helga Zepp-LaRouche.

The combination of the global financial collapse, an escalation of the Afghanistan War, and a planned military strike against Iran, could cause a chain reaction that would plunge the world into a new Dark Age.

- **Thai Monarchy Is Going Down with the British Empire**

When a monarchy turns against the people, as Thailand's did on April 10, the monarchy itself is likely to find itself on the way out, as France's Louis XVI learned.

- **Will Singh Preside Over New Indian Famine?**

Instead of addressing what should be considered as the key to India's survival, by transforming the nation's vast and largely impoverished agricultural sector, leaders in New Delhi sing hosannas about Information Technology and its direct offshoots, which serves not even 1% of the population. Will the famines of the British Raj return as a result?
